DETAILED ACTION

1. Applicant's Preliminary Amendment, filed 10/4/01, is acknowledged.

Claims 1-20 have been cancelled.

Claims 21-36 have been added.

Claims 21-36 are pending and under consideration.

Sequence Compliance

2. Sequence compliance: The CRF, paper copy of the Sequence Listing and Statement that the CRF and Sequence Listing are identical, filed 1/15/02, has been entered.

However, after further review of the specification it has been noted that the sequences disclosed on page 20 at lines 3-10 (SEQ ID NOS: 3 and 4) are degenerate *nucleic acid sequences*. The instant Sequence Listing and Paper Copy presents SEQ ID NOS:3 and 4 as amino acid sequences.

Therefore, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason set forth above and on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Drawing Requirement

3. Formal drawings have been submitted which fail to comply with 37 CFR 1.84.

Please see the enclosed form PTO-948.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

A. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

B. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

*Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.185(a). Failure to take corrective action within the set (or extended) period will result in **ABANDONMENT** of the application.*

Art Unit: 1644

Restriction Requirement

4. The following is noted:

Claim 21 recites a method of “modulating” costimulation of human T lymphocytes. The term “modulating” is ambiguous in that it encompasses both methods of activating and methods of inhibiting. Further, methods of activating and methods of inhibiting are mutually exclusive in that they reach opposing endpoints.

Consequently, the claims have been limited to either a method of *inhibiting* costimulation of human T lymphocytes, or a method of *activating* costimulation of human T lymphocytes, irrespective of the format of the claims.

5. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 21 and 29, drawn to a method of *activating* costimulation of human T lymphocytes, comprising administering an *8F4 polypeptide*, classified in Class 424, subclass 184.1.

II. Claims 21, 23 and 25-28, drawn to a method of *activating* costimulation of human T lymphocytes, comprising administering an *antibody* to an 8F4 polypeptide, classified in Class 424, subclass 130.1.

III. Claims 21-22, 29-30 and 36, drawn to a method of *inhibiting* costimulation of human T lymphocytes and inhibiting rejection of an organ transplant, comprising administering an *8F4 polypeptide*, classified in Class 424, subclass 184.1.

IV. Claims 21-28 and 30-35, drawn to a method of *inhibiting* costimulation of human T lymphocytes, comprising administering an *antibody* to an 8F4 polypeptide, classified in Class 424, subclass 184.1.

The Inventions are distinct, each from the other because:

6. Groups I-IV are each different methods. As noted supra, methods of activating and methods of inhibiting accomplish mutually exclusive endpoints. In addition, methods comprising administering antibodies and methods comprising administering polypeptides differ with respect to ingredients and method steps. Therefore, each method is patentably distinct.

7. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search, which would not be completely co-extensive. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

Art Unit: 1644

8. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Roark whose telephone number is (703) 605-1209. The examiner can normally be reached Monday through Friday from 8:00 AM to 4:30 PM. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1.
